Benvenuti al tutorial EBSCO su **Nursing Reference Center (NRC)**. NRC offre ad infermieri, amministrativi, studenti e docenti delle discipline infermieristiche e bibliotecari biomedici, le migliori e piu' recenti evidenze cliniche disponibili e informazioni di reference attraverso una specifica interfaccia grafica infermieristica.

Attraverso questo tutorial, imparerete a condurre una ricerca di base e l'utilizzo delle varie opzioni di navigazione di NRC, comprese la home page, la lista dei risultati e il dettaglio delle pagine contenutistiche.

Usando NRC si puo' effettuare una ricerca per parola chiave o sfogliare un specifico contenuto.

Quando si esegue una ricerca per parola chiave, NRC mette a disposizione dei limiti che rispecchiano il processo comune che gli infermieri seguono quando devono assistere i pazienti. Cio' consente agli infermieri di ottenere l'informazione piu' pertinente rispetto allo stato specifico di salute del paziente.

Quick Lesson

By: Tanja Schub, BS
Edited by: Diane Pravikoff, RN, PhD, FAAN
Cinahl Information Systems

Description/Etiology

Ewing sarcoma is the second most common type of malignant bone tumor in children and young adults and the most lethal bone tumor. First described by James **Ewing** in 1921, **Ewing sarcoma** forms in the marrow spaces of all types of bones, but it most often occurs in the long bones of the arms and legs, the pelvis, and the chest.

Ewing sarcoma is a small round cell tumor classified as a primitive neuroectodermal tumor; this family of tumors includes peripheral primitive neuroectodermal tumor of bone, extraosseous **Ewing sarcoma**, and Askin's tumor. The cause of **Ewing sarcoma** is unknown, but it is thought to arise from a genetic mutation affecting pluripotent neural crest cells, which give rise to various structures in the central nervous system.

Various imaging techniques, including X-ray, CT scan, MRI, and bone scan, may be used in the assessment of a patient with suspected **Ewing sarcoma**. Bone biopsy is needed for definitive diagnosis. The tumor most often metastasizes to the lungs and various bones.

Treatment usually involves a combination of chemotherapy, local resection, and radiation therapy. The prognosis depends on the size and location of the tumor and whether or not the tumor has spread. Patients with tumors at

Se disponibili, una casella con informazioni correlate (**Related Information**) e' a disposizione e contiene i link agli altri documenti relativi allo stesso argomento presenti in NRC.

The screenshot shows the Nursing Reference Center (NRC) website interface. At the top left is the EBSCO Publishing logo. The main header includes the NRC logo and the text "powered by EBSCOhost". Navigation links include "Home", "Advanced Search", "Sign In", "Folder", "Preferences", "Send Feedback", and "Help". A "Demonstration Customer" link is also present. A horizontal menu of purple buttons is circled in red, containing: "Basic Search", "Diseases & Conditions", "Skills & Procedures", "Drug Information", "Patient Education", "Practice Resources", and "Continuing Education". Below this is a search bar with a "Find:" label, a search input field, and "Search" and "Clear" buttons. Underneath the search bar are checkboxes for "Assessment", "Diagnosis", "Planning", "Implementation", and "Evaluation". The main content area is divided into three sections: "Spotlight" with key features like "Central Venous Catheter Skills" and "Congestive Heart Failure"; "Nursing News" with links to articles such as "Don't Invite Holiday Stress Into Your Home" and "Eat Up, But Eat Healthy This Holiday Season"; and "Search Other Services" with logos for DynaMed and EBSCO HOST CINAHL.

NRC permette di visualizzare diverse schermate nelle quali e' possibile navigare per specifici documenti o informazioni.

Queste pagine di browsing sono accessibili dalle etichette in alto nell'interfaccia di NRC : Diseases & Conditions, Skills & Procedures, Drug Information, Patient Education, Practice Resources, and Continuing Education.

Title: Addison's Disease By: Badash M, Sinnott B, Health Library: Evidence-Based Information, November 1, 2009

Database: Nursing Reference Center

Addison's Disease

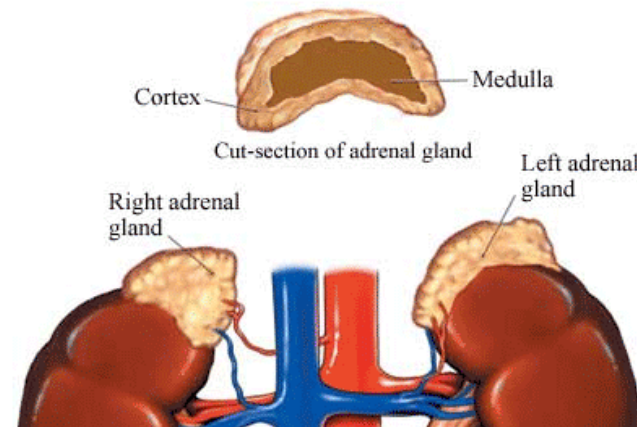

(Adrenal Insufficiency; Adrenocortical Hypofunction; Chronic Adrenocortical Insufficiency; Hypoadrenalism)

by: Michelle Badash, MS

Definition

Addison's disease is a rare disorder of the adrenal glands. In the case of Addison's, the glands do not produce enough of the hormones cortisol and aldosterone.

Anterior Cruciate Ligament (ACL) Injury

by: Carrie Myers Smith

Pronounced: an-TEER-ee-or KROO-shee-ate ligament

[Definition](#) | [Causes](#) | [Risk Factors](#) | [Symptoms](#) | [Diagnosis](#) | [Treatment](#) | [Prevention](#)

[En Español \(Spanish Version\)](#)

Definition

An anterior cruciate ligament (ACL) injury is a tear in the ACL ligament. The ACL is located in the middle of the knee joint and connects the lower leg bone to the thigh bone and prevents the leg bone from sliding too far forward at the knee, which would cause instability.

Le informazioni personalizzate appaiono in alto nella prima pagina del documento stampato.

Per ottenere risultati veramente precisi quando si sta performing una ricerca per parola chiave, NRC offre una schermata di **Advanced Search**. La ricerca avanzata mette a disposizione le funzionalità per selezionare specifici tipi di documenti, applicare limiti e specificare il tipo di pubblicazione.

NRC comprende una cartella personale, un'area nella quale si possono conservare i risultati delle ricerche, link permanenti alle ricerche, salvare le ricerche, gli alert per ricerche e per riviste e le pagine web.

Dalla cartella e' possibile stampare, inviare e-mail o salvare piu' risultati contemporaneamente. Se si e' registrati nel proprio account personale NRC, ogni cosa inserita nella cartella e' automaticamente salvata alla fine della sessione.

The screenshot shows the 'My Folder' interface. On the left, a folder tree is visible with 'Diabetes' expanded to show sub-folders: 'Type 1', 'Type 2', 'Patient Education', 'Articles (4)', and 'Treatment Guidelines'. The 'Articles (4)' folder is highlighted with a red circle. The main area displays a list of four articles under the heading 'Diabetes: Type 2: Patient Education: Articles'. Each article has a checkbox, a title, author information, and options for 'HTML Full Text' and 'PDF Full Text'. The interface also includes navigation controls like 'Page: 1', '1-4 of 4', and action buttons for 'Print', 'E-mail', 'Save', and 'Export'.

Article Title	Author	Publication Info	Options
1. Diabetes Insipidus	Buckley L;	CINAHL Nursing Guide; Cinalh Information Systems, 2005 Jan 3. (2p) (quick lesson) CINAHL AN: 5000000387	HTML Full Text PDF Full Text (74K)
2. Diabetes Mellitus, Gestational	Strayer DA; Pravikoff D;	CINAHL Nursing Guide; Cinalh Information Systems, 2007 Aug 8. (2p) (quick lesson) CINAHL AN: 5000000890	HTML Full Text PDF Full Text (169K)
3. Diabetes Mellitus, Type 1	Strayer DA;	CINAHL Nursing Guide; Cinalh Information Systems, 2005 Oct 11. (2p) (quick lesson) CINAHL AN: 5000001027	HTML Full Text PDF Full Text (77K)
4. Diabetes Mellitus, Type 2	Strayer DA;	CINAHL Nursing Guide; Cinalh Information Systems, 2005 Oct 11. (2p) (quick lesson) CINAHL AN: 5000001606	HTML Full Text PDF Full Text (77K)

E' anche possibile creare delle sottocartelle personalizzate nella propria cartella principale.

Infermieri, amministrativi e coordinatori della formazione troveranno le sottocartelle molto utili specialmente per organizzare documenti frequentemente consultati circa specifiche condizioni mediche. All'interno di ogni sottocartella e' possibile conservare tanti documenti quanti desiderati – come pacchetti di Patient Education, linee guida e Quick Lessons.

Le sottocartelle personalizzate possono anche essere condivise con altri utenti NRC utilizzando la funzione di condivisione.
